HOW DR. TEMI WORKS

Telepresence Built For Clinical Environments

Not another video call — a mobile, autonomous platform that brings physician expertise, safety monitoring, and nursing support directly to the bedside.

Physician Presence At The Bedside

Bring a physician to the patient in minutes — with no on-site requirement.

Beyond Standard Telehealth

Autonomous navigation, secure video, monitoring, and digital examination tools.

Faster Clinical Response

Cover urgent situations and coverage gaps the moment they happen.

Better Continuity

Keep care local with fewer unnecessary transfers.

Secure & Encrypted

HIPAA compliant, designed for clinical-grade privacy and data security.

Works With Your Team

Supports physicians, nurses, and care teams — never replaces them.

BUILT ON TEMI V3

The Care Robot, Ready Out Of The Box

Transform The Way You Deliver Care

Dr. temi runs on temi V3 — a single, complete platform with autonomous navigation, secure telepresence, and a full suite of clinical monitoring tools built in. No custom hardware integration required.

SOLUTIONS — VIRTUAL CARE

Intelligent Solutions Across The Care Journey

Explore how Dr. temi supports virtual care, patient engagement, and hands-free nursing workflows.

VIRTUAL CARE

Telemedicine

Connects patients with remote doctors through video consultation, while supporting on-site nurses with live vital signs monitoring and communication tools.

PATIENT SUPPORT

Patient Navigator

Guides patients from reception to clinics, departments, and service points — reducing confusion and creating a smoother patient journey.

CARE OPERATIONS

Nursing Assistance

Follows nurses during hospital rounds and carries essential medical supplies, enabling a more efficient, hands-free, patient-focused workflow.

FAMILY CONNECTION

Remote Visit

Enables real-time remote family visits through video communication, helping seniors stay emotionally connected with loved ones.

HEALTH GUIDANCE

Health Information

Provides easy access to health education and hospital information, allowing patients and visitors to quickly find guidance and make informed decisions.

Works With Your Existing Providers

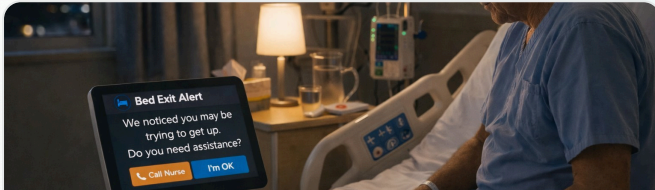

Dr. temi integrates into your current clinical workflows — no need to replace your existing physician network or care software.

24/7

SOLUTIONS — SAFETY & WELLBEING

Always Watching. Always Caring.

From fall response to nightly rounds, Dr. temi keeps every ward safer — and every resident a little more connected.

SAFETY

Fall Prevention

Responds immediately when a patient leaves the bed, providing assistance options and notifying caregivers to help prevent falls.

SAFETY

Fall Detection

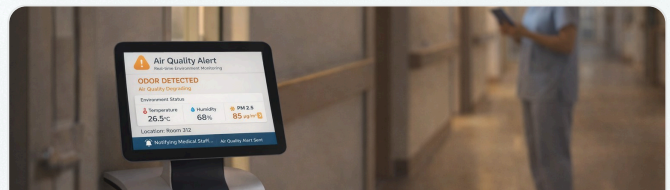

Automatically detects falls and alerts medical staff while guiding patients to remain safe and still until help arrives.

MONITORING

Night Patrol

Performs autonomous night patrol rounds, allowing nurses to remotely monitor multiple wards and respond to alerts throughout the night.

ENVIRONMENT

Odor Monitoring

Monitors hospital environments during patrol and detects abnormal odours, automatically notifying staff so issues are addressed early.

WELLBEING

Joyful Companionship

Turns senior living spaces into lively social environments through karaoke, music, and interactive movement — encouraging seniors to sing, move, and enjoy meaningful moments together.

One Robot, Every Shift Covered

From daytime rounds to overnight patrol, Dr. temi keeps watch so your care team never has to choose between coverage and rest.

Health Program Winner 2026

Dr. temi is recognised for its impact on physician access and patient outcomes — bringing the same award-winning telepresence platform to healthcare facilities across Singapore.

FAQ

Everything You Need To Know

Q. How does Dr. temi work?

Dr. temi is a telepresence healthcare solution that enables medical professionals to connect with patients remotely through a mobile, interactive robot platform.

Q. Where can Dr. temi be deployed?

Dr. temi deploys across skilled nursing facilities, long-term care communities, rural clinics, hospitals, and home care settings — anywhere patients need faster physician access.

Q. Is the platform secure?

Yes. Dr. temi is HIPAA compliant with secure, encrypted video and data handling designed for clinical environments.

Q. Does Dr. temi replace healthcare staff?

No. Dr. temi supports physicians, nurses, and care teams by bringing clinical expertise to the bedside — it never replaces the people delivering care.
